

# Fairstone Responsible Active 4

## Investment Aim

The Portfolio is designed to provide risk adjusted returns. It aims to achieve capital appreciation and reduce investment risk through diversification across asset classes and geographies.

This Portfolio is managed to maximise risk adjusted returns within a target volatility range of 6.5-10.0% over rolling 10-year time periods. This is not guaranteed, and actual volatility may fluctuate outside of these boundaries.

Ranking the risk on a scale of between 1 and 10, where 1 is the lowest, Fairstone place this portfolio as 4.

The Portfolio is likely to be predominantly invested in fixed income, alternatives and equities.

## Portfolio Managers Market Commentary

**Portfolio Manager**

Imogen Hambly

Having started the year well, global equity markets weakened through February as fears surrounding the new US administration's policy agenda weighed on corporate and consumer confidence. Global equities fell -1.9%, in GBP terms, driven lower by losses across the US.

The US technology sector exhibited particular weakness, with falling momentum and lingering concerns around competition in artificial intelligence (AI) leading the Nasdaq index to close the month down -5.0%. Other sectors, however, provided better returns, evidence of the continued rotation in leadership within the US market.

Outside the US, regional equity returns were more varied. While movements in the yen weighed on performance from Japanese equities, the FTSE 100 gained, adding 1.6%. Broad European equities rose 2.3%, continuing their strong run of form, with a weaker euro and optimism around potential ECB rate cuts helping stimulate growth.

Chinese equities also performed well, as investor sentiment continued to edge up following government announcements of further policy support, in addition to new-found positivity relating to the region's technology and AI stocks. Weakness in the US dollar added a further tailwind to emerging market stocks.

Within bond markets, weakness in US sentiment and concerns over the region's growth outlook led to a drop in yields, as investors moved to predict a faster pace of interest rate cuts. US Treasuries outperformed, gaining 2.1%, with the changing risk backdrop leading broad government bond indices to outperform their corporate counterparts for the first time in some months.

Across alternative assets, the prospect of falling real yields buoyed returns from gold, which pushed out to reach a new all-time high. Real estate assets also benefitted from falling bond yields.

Against this backdrop the portfolios posted losses, with lower risk models outperforming their higher risk counterparts. Overall, our overweight allocation to UK and emerging market equities benefitted, although broad sustainability related tilts detracted from returns across our global equity solutions. Within our alternative and lower risk holdings, multi-asset fund, Troy Trojan Ethical continued to provide ballast, while our fixed income funds all posted gains.

## Fund In Focus

### Templeton Global Climate Change

This global equity strategy from Franklin Templeton offers a unique approach to investing in the climate change theme. With a clear exclusionary framework in place, the focus of the fund is on finding companies that provide solutions to mitigate and adapt to climate change, as well as those that are actively adapting their business models to be more resilient in the face of climate change and resource depletion.

What makes this solution particularly interesting is its overweight position in peer leading companies within the materials sector – a segment of the market that is essential to the energy transition, but often overlooked by sustainable equity funds.

By tackling the more difficult parts of the market in a way that is credible, transparent, and remains true to their sustainability targets, the team at Franklin Templeton have been able to create a strategy that sits apart from peers, in a market that often lacks genuine diversification. Going forward, the Fairstone Environmental portfolios will undoubtedly benefit from having exposure to this fund and the market leading companies that it holds.

## Target Market

---

Access to the portfolios is only available to investors on the recommendation of a financial adviser and it is the role of the adviser to determine the appropriateness and suitability of the portfolio to each investor's own personal needs, objectives and preferences.

**Type of investors:** Given the nature of non-complex UCITS funds the service is suitable for retail investors, professional clients and eligible counterparties. The service is predominantly designed for the use of retail investors.

**Investors' knowledge and experience:** Investors with basic, informed or advanced knowledge and experience of capital markets and investment risks and of funds and their characteristics.

**Clients' financial situation with a focus on the ability to bear losses:** Investors have a tolerance to fluctuations in capital invested and potential capital loss.

**Clients' risk tolerance and compatibility of the risk/reward profile of the product with the target market:** Due to the volatility of the markets in which the service may invest e.g. equity, bond and property markets the service has a risk and reward profile that is compatible with clients who have a risk tolerance aligned to the Investment Aim of the portfolio. Investors should be willing to accept price fluctuations in exchange for the opportunity of possible higher returns.

**Clients' objectives and needs:** Depending on the duration of the investment the portfolio may be suitable for clients who have a medium-term investment horizon (at least 5 years).

**Clients who should not invest (the 'negative-target market'):** This portfolio is deemed incompatible for clients who require full capital protection and/or are seeking on-demand full repayment of the amounts invested or who are fully risk averse/have no risk tolerance.
