

Fairstone Brooks Macdonald 3

Investment Aim

The portfolio is designed to provide risk adjusted returns. It aims to achieve capital appreciation and reduce investment risk through diversification across asset classes and geographies.

This portfolio is managed to maximise risk adjusted returns within a target volatility range of 4.7% and 8.3% over rolling 10-year time periods. This is not guaranteed, and actual volatility may fluctuate outside of these boundaries.

Ranking the risk on a scale of between 1 and 10, where 1 is the lowest, we place this portfolio as 3.

Investment Adviser's Market Commentary

Investment Adviser

Brooks Macdonald have a strong team leading the management of the Fairstone BM Model Portfolios, including highly experienced investment managers Frank Atkins, Alex Chittenden, James Hussey and Mark Shields. The team has consistently delivered strong investment performance, underpinned by their centralised investment process, providing clients and advisers with access to their award-winning investment management capabilities and high levels of service.

Energy markets were central to this month's narrative, with a sharp reversal in oil prices reshaping the macro backdrop. Improving diplomatic signals, stabilising shipping flows through the Strait of Hormuz, and a temporary easing of sanctions on Iran helped oil retrace significantly over June, ending the month near pre-conflict levels. This decline has eased nearterm inflation expectations and provided some relief to bond markets. That said, the speed of the move highlights how sensitive inflation and market sentiment remain to geopolitical developments, leaving the outlook inherently fragile.

While falling energy prices have helped soften headline inflation pressures, central banks continued to signal caution. The Federal Reserve's first meeting under new chair Kevin Warsh struck a more hawkish and less predictable tone, reinforcing that policymakers remain focused on inflation credibility despite improving data. Similarly, the European Central Bank maintained a tightening stance, raising rates by 25 basis points. Markets have oscillated between pricing "higher for longer" and a more benign path, reflecting mixed signals from resilient labour markets, softer core inflation, and easing energy costs. Overall, policy expectations remain finely balanced, with little room for complacency on inflation.

A sharp correction in mega-cap technology stocks, notably the Magnificent 7, weighed on headline indices and masked a more resilient underlying picture. The pullback was most pronounced in semiconductors, where positioning and expectations had become particularly stretched. In contrast, equal weight indices and smaller-cap equities held up relatively well, suggesting improving market breadth after a prolonged period of concentrated leadership. Strong earnings in parts of the tech sector provided intermittent support, and the broader move reflects a repricing of elevated expectations rather than a deterioration in fundamentals. This rotation highlights the risks of concentrated exposure and points to a more balanced and selective market environment.

Economic data over the month reinforced a picture of resilience, but markets became increasingly sensitive to surprises. Strong US labour market data challenged expectations of an imminent slowdown and pushed bond yields higher, while softer inflation prints later helped reverse some of that move. This pattern, where "good news is bad news" for markets, reflects the tension between solid growth and restrictive policy. Meanwhile, global data remained mixed but broadly stable, supporting risk assets as geopolitical fears eased. The key takeaway is that while the growth backdrop remains intact, markets are likely to stay highly reactive to incremental data shifts and evolving policy expectations.

Target Market

Access to the portfolios is only available to investors on the recommendation of a financial adviser and it is the role of the adviser to determine the appropriateness and suitability of the portfolio to each investor's own personal needs, objectives and preferences.

Type of investors: Given the nature of non-complex UCITS funds the service is suitable for retail investors, professional clients and eligible counterparties. The service is predominantly designed for the use of retail investors.

Investors' knowledge and experience: Investors with basic, informed or advanced knowledge and experience of capital markets and investment risks and of funds and their characteristics.

Clients' financial situation with a focus on the ability to bear losses: Investors have a tolerance to fluctuations in capital invested and potential capital loss.

Clients' risk tolerance and compatibility of the risk/reward profile of the product with the target market: Due to the volatility of the markets in which the service may invest e.g. equity, bond and property markets the service has a risk and reward profile that is compatible with clients who have a risk tolerance aligned to the Investment Aim of the portfolio. Investors should be willing to accept price fluctuations in exchange for the opportunity of possible higher returns.

Clients' objectives and needs: Depending on the duration of the investment the portfolio may be suitable for clients who have a medium-term investment horizon (at least 5 years).

Clients who should not invest (the 'negative-target market'): This portfolio is deemed incompatible for clients who require full capital protection and/or are seeking on-demand full repayment of the amounts invested or who are fully risk averse/have no risk tolerance.
