Imogen Hambly

Imogen is a CFA Charterholder and also holds the Investment Management Certificate along with the Diploma in Regulated Financial Planning. She has worked in the industry since 2014 with an emphasis on investment research & analysis.

Portfolio Managers Market Commentary

Through May, global equity markets rebounded strongly, buoyed by easing trade tensions and improving consumer sentiment. Developed market stocks outperformed their emerging market counterparts, led by gains from U.S. markets, and from the U.S. technology sector in particular, with the Nasdaq index gaining 8.1%, in GBP.

U.S. trade negotiations continued between the White House and other key global governments, with significant progress made between the U.S. and the E.U., while a mid-month trade truce between the U.S. and China helped fuel gains across risk assets.

While trade tariffs remain the focal point of President Trump's economic agenda, early sightings of his budget reconciliation bill point to new tax and regulatory changes that will help boost the U.S. domestic business landscape – a development that proved positive for small cap stocks through the month.

Elsewhere, both European and U.K. equities posted gains, with upward earnings revisions helping underpin confidence in the European equity market. Within the U.K., GDP data surprised to the upside, while announcements of trade deals with India and the U.S. further added to optimism. However, inflation in the region remains stubbornly high, and fears are mounting over government borrowing levels.

Across bond markets, the picture was more challenging, as concerns over fiscal deficits in both the U.S. and U.K. pushed up long-dated yields, weighing heavily on government bond prices. Improving trade tensions helped buoy returns from credit markets, with the global high yield index benefitting from a brighter growth outlook and eking out a gain of 1.6%, however, broad weakness in government bonds led the global aggregate index to close the month down 0.5%.

Commodity markets also struggled. Gold was especially weak through the period, falling 0.9%, as investors capitalised on falling recessionary fears by shifting capital way from defensive assets. Other alternative asset classes, notably property and infrastructure, benefitted from the improving appetite, posting gains.

Looking ahead, unpredictable trade policies, ongoing inflationary pressures, and divergent fiscal responses are expected to sustain market volatility. Investors are advised to focus on diversification across geographies and asset classes while maintaining flexibility to adapt to evolving conditions.

Against this backdrop the portfolios gained, with U.S. equity allocations driving returns. Within our U.S. exposure, strong performance from the mega-cap technology stocks led the market-cap weighted *HSBC American Index* to outperform the *L&G S&P 500 US Equal Weight Index*. Elsewhere, exposure to global small cap equities also performed well, gaining 4.8%. Although all other equity allocations posted gains, strong performance from North American stocks meant our underweight to the region detracted on a net basis. Returns from our fixed income holdings were mixed, however we benefitted from our overweight to credit over government bonds and from our underweight to duration.

Target Market

Access to the portfolios is only available to investors on the recommendation of a financial adviser and it is the role of the adviser to determine the appropriateness and suitability of the portfolio to each investor's own personal needs, objectives and preferences.

Type of investors: Given the nature of non-complex UCITS funds the service is suitable for retail investors, professional clients and eligible counterparties. The service is predominantly designed for the use of retail investors.

Investors' knowledge and experience: Investors with basic, informed or advanced knowledge and experience of capital markets and investment risks and of funds and their characteristics.

Clients' financial situation with a focus on the ability to bear losses: Investors have a tolerance to fluctuations in capital invested and potential capital loss.

Clients' risk tolerance and compatibility of the risk/reward profile of the product with the target market: Due to the volatility of the markets in which the service may invest e.g. equity, bond and property markets the service has a risk and reward profile that is compatible with clients who have a risk tolerance aligned to the Investment Aim of the portfolio. Investors should be willing to accept price fluctuations in exchange for the opportunity of possible higher returns.

Clients' objectives and needs: Depending on the duration of the investment the portfolio may be suitable for clients who have a medium-term investment horizon (at least 5 years).

Clients who should not invest (the 'negative-target market'): This portfolio is deemed incompatible for clients who require full capital protection and/or are seeking on-demand full repayment of the amounts invested or who are fully risk averse/have no risk tolerance.
