

Fairstone Responsible Active 7

Investment Aim

The Portfolio is designed to provide risk adjusted returns. It aims to achieve capital appreciation and reduce investment risk through diversification across asset classes and geographies.

This portfolio is managed to maximise risk adjusted returns within a target volatility range of 11.8-15.4% over rolling 10-year time periods. This is not guaranteed, and actual volatility may fluctuate outside of these boundaries.

Ranking the risk on a scale of between 1 and 10, where 1 is the lowest, Fairstone place this portfolio as 7.

The portfolio is likely to be predominantly invested in equities, fixed income and alternatives.

Portfolio Managers Market Commentary

Through May, global equity markets rebounded strongly, buoyed by easing trade tensions and improving consumer sentiment. Developed market stocks outperformed their emerging market counterparts, led by gains from U.S. markets, and from the U.S. technology sector in particular, with the Nasdaq index gaining 8.1%, in GBP.

U.S. trade negotiations continued between the White House and other key global governments, with significant progress made between the U.S. and the E.U., while a mid-month trade truce between the U.S. and China helped fuel gains across risk assets.

While trade tariffs remain the focal point of President Trump's economic agenda, early sightings of his budget reconciliation bill point to new tax and regulatory changes that will help boost the U.S. domestic business landscape – a development that proved positive for small cap stocks through the month.

Elsewhere, both European and U.K. equities posted gains, with upward earnings revisions helping underpin confidence in the European equity market. Within the U.K., GDP data surprised to the upside, while announcements of trade deals with India and the U.S. further added to optimism. However, inflation in the region remains stubbornly high, and fears are mounting over government borrowing levels.

Across bond markets, the picture was more challenging, as concerns over fiscal deficits in both the U.S. and U.K. pushed up long-dated yields, weighing heavily on government bond prices. Improving trade tensions helped buoy returns from credit markets, with the global high yield index benefitting from a brighter growth outlook and eking out a gain of 1.6%, however, broad weakness in government bonds led the global aggregate index to close the month down 0.5%.

Commodity markets also struggled. Gold was especially weak through the period, falling 0.9%, as investors capitalised on falling recessionary fears by shifting capital way from defensive assets. Other alternative asset classes, notably property and infrastructure, benefitted from the improving appetite, posting gains.

Looking ahead, unpredictable trade policies, ongoing inflationary pressures, and divergent fiscal responses are expected to sustain market volatility. Investors are advised to focus on diversification across geographies and asset classes while maintaining flexibility to adapt to evolving conditions.

Against this backdrop the portfolios gained, with U.S. and clean energy stocks driving growth. Having struggled through recent times, the *Schroder Global Alternative Energy* fund experienced a strong early month bounce, benefitting from renewed hopes of global growth, ultimately closing May up 8.7%. Recently added *Brown Advisory US Sustainable Growth* also exhibited above benchmark returns, adding 8.4%, with good returns from technology and cyclical stocks helping boost performance. Elsewhere, returns from our other equity strategies were positive, albeit our underweight to U.S. equities detracted from portfolio performance as a whole. Across our fixed income allocations, overweight positions in credit versus government bonds benefitted, as did our underweight to duration. Exposure to alternative assets also benefitted.

Fund In Focus

Templeton Global Climate Change

This global equity strategy from Franklin Templeton offers a unique approach to investing in the climate change theme. With a clear exclusionary framework in place, the focus of the fund is on finding companies that provide solutions to mitigate and adapt to climate change, as well as those that are actively adapting their business models to be more resilient in the face of climate change and resource depletion.

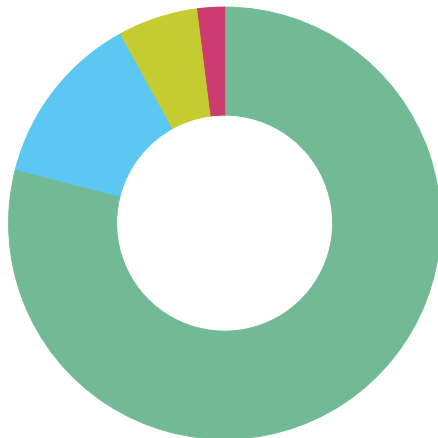

What makes this solution particularly interesting is its overweight position in peer leading companies within the materials sector – a segment of the market that is essential to the energy transition, but often overlooked by sustainable equity funds.

By tackling the more difficult parts of the market in a way that is credible, transparent, and remains true to their sustainability targets, the team at Franklin Templeton have been able to create a strategy that sits apart from peers, in a market that often lacks genuine diversification. Going forward, the Fairstone Environmental portfolios will undoubtedly benefit from having exposure to this fund and the market leading companies that it holds.

Target Market

Access to the portfolios is only available to investors on the recommendation of a financial adviser and it is the role of the adviser to determine the appropriateness and suitability of the portfolio to each investor's own personal needs, objectives and preferences.

Type of investors: Given the nature of non-complex UCITS funds the service is suitable for retail investors, professional clients and eligible counterparties. The service is predominantly designed for the use of retail investors.

Investors' knowledge and experience: Investors with basic, informed or advanced knowledge and experience of capital markets and investment risks and of funds and their characteristics.

Clients' financial situation with a focus on the ability to bear losses: Investors have a tolerance to fluctuations in capital invested and potential capital loss.

Clients' risk tolerance and compatibility of the risk/reward profile of the product with the target market: Due to the volatility of the markets in which the service may invest e.g. equity, bond and property markets the service has a risk and reward profile that is compatible with clients who have a risk tolerance aligned to the Investment Aim of the portfolio. Investors should be willing to accept price fluctuations in exchange for the opportunity of possible higher returns.

Clients' objectives and needs: Depending on the duration of the investment the portfolio may be suitable for clients who have a medium-term investment horizon (at least 5 years).

Clients who should not invest (the 'negative-target market'): This portfolio is deemed incompatible for clients who require full capital protection and/or are seeking on-demand full repayment of the amounts invested or who are fully risk averse/have no risk tolerance.
