

Fairstone Passive Model Portfolio 6 Powered by Vanguard

Investment Aim

The portfolio is designed to provide risk adjusted returns. It aims to achieve capital appreciation and reduce investment risk through diversification across asset classes and geographies.

This portfolio is managed to maximise risk adjusted returns within a target volatility range of 10% and 13.6% over rolling 10-year time periods. This is not guaranteed, and actual volatility may fluctuate outside of these boundaries.

Ranking the risk on a scale of between 1 and 10, where 1 is the lowest, we place this portfolio as 6.

Investment Adviser's Market Commentary

Investment Adviser

Vanguard

In Q2 2025, trade and policy uncertainty dominated headlines. Trade distortions caused economic activity to soften in the US but improve in the euro area and the UK. While inflation fell below target in the euro area and was benign in the US, it remained elevated in the UK. During the quarter, the European Central Bank (ECB) cut interest rates twice, the Bank of England (BoE) once and the US Federal Reserve (Fed) kept interest rates unchanged.

In the UK, growth expanded by 0.7% (quarter-on-quarter) in Q1, while Q2 survey data suggested the uptick was due to one-off effects. Employment showed signs of cooling, with the unemployment rate edging up to a three-year high in April. Annual headline inflation rose to 3.4% in May, up from March's 2.6%. Annual core Consumer Price Index, which excludes energy and food components, rose from 3.4% to 3.5% over the same period. The BoE cut interest rates from 4.50% to 4.25% at its May meeting.

In the euro area, economic activity expanded by 0.6% (quarter-on-quarter) in Q1. Like in the UK, the growth was due to one-off trade distortions, with survey data pointing to a normalisation in Q2. Headline inflation edged below the ECB's 2% target, falling from 2.2% in March to 1.9% in May. Core inflation ticked down from 2.4% to 2.3% over the same period. The ECB cut its policy rate by 25 basis points at both its April and June meetings, leaving it at 2.00%.

Lastly, the US economy contracted by 0.2% (quarter-on-quarter, annualised) in Q1. Elevated policy uncertainty, trade tensions and the front-loading of imports all weighed on economic activity. Survey indicators suggested a marginal rebound in Q2. Tariffs are yet to materially impact inflation, with the Fed's preferred inflation measure, the annual Core Personal Consumption Expenditures (PCE) Index, edging down from 2.7% in March to 2.5% in May. Similarly, headline PCE fell from 2.3% to 2.1% over the same period. With the economic outlook clouded by uncertainty, the Fed opted to keep interest rates unchanged. This left the federal funds target range at 4.25-4.50% at the end of Q2.

Vanguard Capital Markets Model

The Vanguard Capital Markets Model Team researches, develops, and maintains a suite of powerful analytical models and tools. At the heart of them is the Vanguard Capital Markets Model (VCMM), a proprietary financial simulation engine that simulates returns for a wide range of asset classes.

The VCMM is designed to enable clients to make asset allocation decisions as well as help build portfolio solutions.

The team uses the VCMM to create dynamic, time-varying portfolios that change their asset allocations in response to the model's forecasts. These time-varying portfolios are designed to target a specific return, target a risk range or seek to maximise returns.

Vanguard has extensive experience in building portfolio solutions. For more than ten years, Vanguard has used these analytical models to construct portfolios for its Institutional Advisory Services group, which manages in excess of USD 40bn in AUM, as of 31 December 2018.

Target Market

Access to the portfolios is only available to investors on the recommendation of a financial adviser and it is the role of the adviser to determine the appropriateness and suitability of the portfolio to each investor's own personal needs, objectives and preferences.

Type of investors: Given the nature of non-complex UCITS funds the service is suitable for retail investors, professional clients and eligible counterparties. The service is predominantly designed for the use of retail investors.

Investors' knowledge and experience: Investors with basic, informed or advanced knowledge and experience of capital markets and investment risks and of funds and their characteristics.

Clients' financial situation with a focus on the ability to bear losses: Investors have a tolerance to fluctuations in capital invested and potential capital loss.

Clients' risk tolerance and compatibility of the risk/reward profile of the product with the target market: Due to the volatility of the markets in which the service may invest e.g. equity, bond and property markets the service has a risk and reward profile that is compatible with clients who have a risk tolerance aligned to the Investment Aim of the portfolio. Investors should be willing to accept price fluctuations in exchange for the opportunity of possible higher returns.

Clients' objectives and needs: Depending on the duration of the investment the portfolio may be suitable for clients who have a medium-term investment horizon (at least 5 years).

Clients who should not invest (the 'negative-target market'): This portfolio is deemed incompatible for clients who require full capital protection and/or are seeking on-demand full repayment of the amounts invested or who are fully risk averse/have no risk tolerance.

Important Notices

This factsheet is for illustrative purposes only. Investments linked to this model portfolio may not exactly replicate the model portfolio described due to differences in timing of the initial investment or rebalancing differences resulting from minimum transaction size limits or fund availability on the platform or provider.
