

Fairstone Pure Passive 3

Investment Aim

The Portfolio is designed to provide risk adjusted returns. It aims to achieve capital appreciation and reduce investment risk through diversification across asset classes and geographies.

This Portfolio is managed to maximise risk adjusted returns within a target volatility range of 4.7-8.3% over rolling 10-year time periods. This is not guaranteed, and actual volatility may fluctuate outside of these boundaries.

Ranking the risk on a scale of between 1 and 10, where 1 is the lowest, Fairstone place this portfolio as 3.

The Portfolio is likely to be predominantly invested in fixed income and equities.

Investment Growth

Simulated Performance

Please note performance prior to 1 October 2021 is based in simulated past performance. In order to provide an indication of how the portfolio would have performed in the past, we have produced simulated past performance from 1 October 2020 to 30 September 2021. The simulated performance is based on the actual performance history of the funds within the portfolios using our historical tactical asset allocation, rebalanced to quarterly and adjusted annually. Full details are available on request. The simulated past performance is not a reliable indicator of future performance.

Portfolio Managers Market Commentary

December closed out 2025 with a tone of cautious optimism across global markets. While pockets of volatility persisted, the prevailing narrative was one of consolidation rather than capitulation. Investors weighed the supportive effects of easing inflation and selective central bank rate cuts against ongoing concerns surrounding valuations and geopolitical uncertainty. Against this backdrop, both equity and fixed income markets delivered mixed outcomes.

In line with trends observed earlier in the year, market leadership continued to broaden, with UK, European and Emerging Market equities outperforming US stocks. This broadening was also evident at the sector level, where cyclical and value sectors outperformed growth, reflecting investor demand for diversification amid growing questions over the sustainability of AI-driven spending trends.

Within the US, the S&P 500 declined 1.6% in GBP terms, outperforming the Nasdaq, which fell 2.1%, as technology stocks - key drivers of 2025's rally - faced valuation headwinds. While investor caution toward US equities increased, a portion of these declines reflected currency movements following the Federal Reserve's third rate cut of the year.

Closer to home, European equities outperformed their US counterparts, supported by lower exposure to high-valuation technology stocks and stabilising energy prices. The MSCI Europe ex UK Index rose 2.2%, capping a strong period for the region, with defensive sectors and financials contributing meaningfully amid optimism around fiscal expansion and easing inflation. UK equities ended the year on a similarly positive note, with the FTSE 100 gaining 2.2% and the FTSE 250 advancing 1.7%, driven by strength in mining and defence stocks alongside expectations of further Bank of England rate cuts.

Elsewhere, emerging market gains were underpinned by strong performances from semiconductor-linked stocks in South Korea and Taiwan, where returns have been notably strong throughout the year. Japanese equities, however, ended the year more subdued, with the MSCI Japan Index declining 1.1% after the Bank of Japan's surprise 25 bps rate hike dampened sentiment.

Across bond markets, returns were mixed as investors navigated a complex environment of policy divergence and shifting inflation expectations. Global government bonds delivered modestly negative returns as long-dated yields rose, while corporate credit outperformed, supported by tighter spreads and resilient fundamentals.

At a policy level, the Federal Reserve implemented its third consecutive 25 bps rate cut, while the Bank of England also reduced rates by 25 bps, with easing inflation and signs of labour market softening providing scope for further policy accommodation in the UK.

Looking ahead, disinflation trends, central bank policy trajectories and the resilience of global growth remain the dominant themes. In this environment, regional equity diversification and allocations to high-quality fixed income continue to play a central role in constructing resilient portfolios.

Against this backdrop, portfolio performance was negative, with exposure to US equities and bonds weighing on returns. At a regional level, overweight positions in the UK, Emerging Markets and Asia proved beneficial: the Vanguard FTSE UK All Share Index rose 2.2%, the HSBC MSCI Emerging Markets Equity Index gained 1.3%, and the abrdn Asia Pacific ex Japan Equity Tracker added 1.0%. European equities were the strongest regional contributor, with the HSBC European Index advancing 2.6%. By contrast, US market weakness detracted, as the HSBC American Index fell 0.5% and the Vanguard FTSE Developed World ex-UK Index declined 0.6%. Real assets struggled amid rising long-dated yields, while short-term bonds and UK government bonds provided valuable stability.

Target Market

Access to the portfolios is only available to investors on the recommendation of a financial adviser and it is the role of the adviser to determine the appropriateness and suitability of the portfolio to each investor's own personal needs, objectives and preferences.

Type of investors: Given the nature of non-complex UCITS funds the service is suitable for retail investors, professional clients and eligible counterparties. The service is predominantly designed for the use of retail investors.

Investors' knowledge and experience: Investors with basic, informed or advanced knowledge and experience of capital markets and investment risks and of funds and their characteristics.

Clients' financial situation with a focus on the ability to bear losses: Investors have a tolerance to fluctuations in capital invested and potential capital loss.

Clients' risk tolerance and compatibility of the risk/reward profile of the product with the target market: Due to the volatility of the markets in which the service may invest e.g. equity, bond and property markets the service has a risk and reward profile that is compatible with clients who have a risk tolerance aligned to the Investment Aim of the portfolio. Investors should be willing to accept price fluctuations in exchange for the opportunity of possible higher returns.

Clients' objectives and needs: Depending on the duration of the investment the portfolio may be suitable for clients who have a medium-term investment horizon (at least 5 years).

Clients who should not invest (the 'negative-target market'): This portfolio is deemed incompatible for clients who require full capital protection and/or are seeking on-demand full repayment of the amounts invested or who are fully risk averse/have no risk tolerance.
